JOURNAL OF AIRCRAFT
Vol. 30, No. 6, Nov.–Dec. 1993

1993 *Journal of Aircraft* Index

How to Use the Index

In the Subject Index, pages 1010–1015, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 1016–1017, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index.The Chronological Index, pages 1018–1023, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1993, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Aerodynamic Shape Optimization Using Sensitivity Analysis on Third-Order Euler Equations C93-158
Euler Code Prediction of Near-Field to Midfield Sonic Boom Pressure Signatures C93-153
Optimization of Joined-Wing Aircraft C93-151
Investigation of Rotor Tip Vortex Interactions with a Body C93-149
Vortex Control Technique for the Attenuation of Fin Buffet C93-145
Computational Study of Blowing on Delta Wings at High Alpha C93-143
Vortex Flow Control Using Fillets on a Double-Delta Wing C93-141
Experimental Verification of a Wall Interference Correction Method with Interface Measurements C93-140
Aerodynamic Performance Effects due to Small Leading-Edge Ice (Roughness) on Wings and Tails C93-139
Transonic Airfoil Design by Constrained Optimization C93-138
Navier-Stokes Investigation of Blunt Trailing-Edge Airfoils Using O Grids C93-135
Transonic Navier-Stokes Flow Computations over Wing-Fuselage Geometries C93-132
Efficient Simulation of Incompressible Viscous Flow over Single and Multielement Airfoils C93-124
Lateral Aerodynamic Interference Between Tanker and Receiver in Air-to-Air Refueling C93-120
Multielement Airfoil Performance due to Reynolds and Mach Number Variations C93-118
Experimental Study of Pylon Cross Sections for a Subsonic Transport Airplane C93-116
Euler/Experiment Correlations of Sonic Boom Pressure Signatures C93-115
Unsteady Wing Surface Pressures in the Wake of a Propeller C93-112
Identification of Actuation System and Aerodynamic Effects of Direct-Lift-Control Flaps C93-111
Experimental Study on the Aerodynamic Effects of a Forward-Sweep Angle C93-110
Unsteady Subsonic Aerodynamics for Bodies and Wings with External Stores Including Wake Effect C93-109
Numerical Simulation of Unsteady Flow Induced by a Flat Plate Moving Near Ground C93-108
Induced Drag of a Crescent Wing Planform C93-106
Aerodynamic Calculation of Complex Three-Dimensional Configurations C93-102
Effects of Wing-Tip Vortex Flaps C93-101
Application of Leading-Edge Vortex Manipulations to Reduce Wing Rock Amplitudes C93-100
Zero-Thrust Glide Testing for Drag and Propulsive Efficiency of Propeller Aircraft C93-091
Reynolds Number Effects on Supersonic Asymmetrical Flows over a Cone C93-089
Wake Structure of a Helicopter Rotor in Forward Flight C93-086
Computation of Induced Drag for Elliptical and Crescent-Shaped Wings C93-084
S-Plane Aerodynamics of Nonplanar Lifting Surfaces C93-082
Dynamic Stability Derivatives Evaluation in a Low-Speed Wind Tunnel C93-078
Permeable Airfoils in Incompressible Flow C93-077
Application of Oswatitsch's Theorem to Supercritical Airfoil Drag Calculation C93-075
Vortex Breakdown Studies of a Canard-Configured X-31A-Like Fighter Aircraft Model C93-071
Unsteady Blade Pressures on a Propfan at Takeoff: Euler Analysis and Flight Data C93-065
Indicial Lift Approximations for Two-Dimensional Subsonic Flow as Obtained from Oscillatory Measurements C93-061
Effects of Blowing on Delta Wing Vortices During Dynamic Pitching C93-060
Nonequilibrium Turbulence Modeling Study on Light Dynamic Stall of a NACA0012 Airfoil C93-055
Multiblock Navier-Stokes Solutions About the F/A18 Wing-LEX-Fuselage Configuration C93-054
Schlieren Studies of Compressibility Effects on Dynamic Stall of Transiently Pitching Airfoils C93-041
Experimental and Nonlinear Vortex Lattice Method Results for Various Wing-Canard Configurations C93-040
Laminar-Flow Instrumentation for Wind-Tunnel and Flight Experiments C93-038
Euler Study on Porous Transonic Airfoils with a View Toward Multipoint Design C93-037
Measurements of Aerodynamic Rotary Stability Derivatives Using a Whirling Arm Facility C93-036
PAN AIR Analysis of Simply Connected Control Surface Deflections C93-032
Effect of Viscous Drag on Optimum Spanwise Lift Distribution C93-031
Total Least Squares Estimation of Aerodynamic Model Parameters from Flight Data C93-030
Viscous Subsonic Flow Computation for Wings with Flaps for High-Lift C93-026
Computational Method for Matching Aerodynamic Experimental Data with Theoretical Influence Matrices C93-022
Passive Control of Delta Wing Rock C93-021
Nonunique Solutions in Unsteady Transonic Flow C93-020
Improvement and Modernization of Subsonic Wind Tunnels C93-008
Fountain Flows Produced by Multijet Impingement on a Ground Plane C93-007
Aerodynamic Effects of Aircraft Ground Deicing/Anti-Icing Fluids C93-004

Aeroelasticity and Aeroservoelasticity

Fractional Order Calculus Model of the Generalized Theodorsen Function C93-165
Accuracy of Rational-Function Approximations for Linear Transonic Unsteady Aerodynamics C93-164
Finite Element Nonlinear Flutter and Fatigue Life of Two-Dimensional Panels with Temperature Effects C93-163
Impact of Active Controls Technology on Structural Integrity C93-162
Application of Nonlinear Systems Theory to Transonic Unsteady Aerodynamic Responses C93-114
Response of B-2 Aircraft to Nonuniform Spanwise Turbulence C93-113
Unsteady Subsonic Aerodynamics for Bodies and Wings with External Stores Including Wake Effect C93-109
Use of Eigenvectors in the Solution of the Flutter Equation C93-099
Time Domain Panel Method for Wings C93-083
S-Plane Aerodynamics of Nonplanar Lifting Surfaces C93-082
Multiple Pole Rational-Function Approximations for Unsteady Aerodynamics C93-080
Evaluation and Extension of the Flutter-Margin Method for Flight Flutter Prediction C93-069

Euler Study on Porous Transonic Airfoils with a View Toward Multipoint Design C93-037
Measurements of Aerodynamic Rotary Stability Derivatives Using a Whirling Arm Facility C93-036
PAN AIR Analysis of Simply Connected Control Surface Deflections C93-032
Effect of Viscous Drag on Optimum Spanwise Lift Distribution C93-031
Total Least Squares Estimation of Aerodynamic Model Parameters from Flight Data C93-030
Viscous Subsonic Flow Computation for Wings with Flaps for High-Lift C93-026
Computational Method for Matching Aerodynamic Experimental Data with Theoretical Influence Matrices C93-022
Passive Control of Delta Wing Rock C93-021
Nonunique Solutions in Unsteady Transonic Flow C93-020
Improvement and Modernization of Subsonic Wind Tunnels C93-008
Fountain Flows Produced by Multijet Impingement on a Ground Plane C93-007
Aerodynamic Effects of Aircraft Ground Deicing/Anti-Icing Fluids C93-004

Aeroelasticity and Aeroservoelasticity

Fractional Order Calculus Model of the Generalized Theodorsen Function C93-165
Accuracy of Rational-Function Approximations for Linear Transonic Unsteady Aerodynamics C93-164
Finite Element Nonlinear Flutter and Fatigue Life of Two-Dimensional Panels with Temperature Effects C93-163
Impact of Active Controls Technology on Structural Integrity C93-162
Application of Nonlinear Systems Theory to Transonic Unsteady Aerodynamic Responses C93-114
Response of B-2 Aircraft to Nonuniform Spanwise Turbulence C93-113
Unsteady Subsonic Aerodynamics for Bodies and Wings with External Stores Including Wake Effect C93-109
Use of Eigenvectors in the Solution of the Flutter Equation C93-099
Time Domain Panel Method for Wings C93-083
S-Plane Aerodynamics of Nonplanar Lifting Surfaces C93-082
Multiple Pole Rational-Function Approximations for Unsteady Aerodynamics C93-080
Evaluation and Extension of the Flutter-Margin Method for Flight Flutter Prediction C93-069

Integrated Structure/Control/Aerodynamic Synthesis of Actively Controlled Composite Wings C93-068
Simultaneous Structure/Control Design Optimization of a Wing Structure with a Gust Load Alleviation System C93-049
Transonic Flutter Analysis Using Time-Linearization Aerodynamics C93-027
Aeroelastic Tailoring Analysis for Preliminary Design of Advanced Propellers with Composite Blades C93-018
Transonic Shock-Induced Dynamics of a Flexible Wing with a Thick Airfoil C93-017

Aerospace Plane

Computational Effects of Inlet Representation on Powered Hypersonic, Airbreathing Models C93-103
Aerodynamic Calculation of Complex Three-Dimensional Configurations C93-102
Air Dissociation Effects on Aerodynamic Characteristics of an Aerospace Plane C93-097
Aerospace Plane Design Challenge: Credible Computations C93-093
Computational Flowfields for Static Testing of Powered Hypersonic Aftbody Models C93-023

Cabin Environment, Crew Training, and Life Support

Military Aircrew Head Support System C93-015

Civil Missions and Transportation

Optimal Takeoff Procedures for a Transport Category Tiltrotor C93-053
Regional Fanjet Aircraft Optimization Studies C93-035

Configuration Design

Optimization of Joined-Wing Aircraft C93-151
Transonic Airfoil Design by Constrained Optimization C93-138
Fundamentals of Low Radar Cross-Sectional Aircraft Design C93-052
Mathematical Phenomenology for Thrust-Vectoring-Induced Agility Comparisons C93-046
Conceptual Assessment of Two High-Speed Rotorcraft C93-045
Experimental and Nonlinear Vortex Lattice Method Results for Various Wing-Canard Configurations C93-040
Regional Fanjet Aircraft Optimization Studies C93-035

Flight Mechanics

Forward Flight Trim and Frequency Response Validation of a Helicopter Simulation Model C93-146
Alternative Solution to Optimum Gliding Velocity in a Steady Head Wind or Tail Wind C93-134
Dynamic Stability Derivatives Evaluation in a Low-Speed Wind Tunnel C93-078
Regional Fanjet Aircraft Optimization Studies C93-035
Fastest Climb of a Piston-Prop Aircraft C93-028
Fastest Climb of a Turbojet Aircraft C93-019

Flight Operations

Extended Range Operations of Two and Three Turbofan Engined Airplanes C93-067
Optimal Takeoff of a Helicopter for Category A V/STOL Operations C93-044
Aerodynamic Effects of Ground De/Anti-Icing Fluids on Fokker 50 and Fokker 100 C93-005
Aircraft Ground Deicing, A Flight Crew Perspective C93-003
Development of an International Standard for Safe Winter Operation C93-002

General Aviation

Target Pitch Angle for the Microburst Escape Maneuver C93-142
Vortex Generators Used to Control Laminar Separation Bubbles C93-057

Ground Effect Machines

Numerical Simulation of Unsteady Flow Induced by a Flat Plate Moving Near Ground C93-108

Man/Machine Interface

Military Aircrew Head Support System C93-015

Manufacturing

Target Pitch Angle for the Microburst Escape Maneuver C93-142

Military Missions

DeHavilland Dash-8 Aircraft Airborne System Testing C93-104

Noise

Thermoacoustic Loads and Fatigue of Hypersonic Vehicle Skin Panels C93-160
In-Flight Source Noise of an Advanced Large-Scale Single-Rotation Propeller C93-154
Rotor Wake/Stator Interaction Noise—Predictions vs Data C93-123
Approximate Method for the Prediction of Propeller Noise Near-Field Effects C93-107
Transonic Blade-Vortex Interactions: Noise Reduction C93-072
Geometrical and Numerical Considerations in Computing Advanced-Propeller Noise C93-064
Role of Leading-Edge Vortex Flows in Prop-Fan Interaction Noise C93-047
Sonic Boom Focal Zones from Tactical Aircraft Maneuvers C93-011

Performance

Selected Design Issues of Some High-Speed Rotorcraft Concepts C93-147
Measurement and Improvement of the Lateral Agility of the F-18 C93-137
Optimal Cruise Performance C93-070
Extended Range Operations of Two and Three Turbofan Engined Airplanes C93-067
Fastest Climb of a Piston-Prop Aircraft C93-028
Fastest Climb of a Turbojet Aircraft C93-019
Aerodynamic Effects of Ground De/Anti-Icing Fluids on Fokker 50 and Fokker 100 C93-005

Powerplant Integration

Design Tradeoffs on Scramjet Engine Integrated Hypersonic Waverider Vehicles C93-157
Ground Vortex Formed by Impinging Jets in Crossflow C93-148

Propeller and Rotor Systems

In-Flight Source Noise of an Advanced Large-Scale Single-Rotation Propeller C93-154
Unsteady Wing Surface Pressures in the Wake of a Propeller C93-112
Approximate Method for the Prediction of Propeller Noise Near-Field Effects C93-107
Zero-Thrust Glide Testing for Drag and Propulsive Efficiency of Propeller Aircraft C93-091
Theodorsen's Ideal Propeller Performance with Ambient Pressure in the Slipstream C93-076
Unsteady Blade Pressures on a Propfan at Takeoff: Euler Analysis and Flight Data C93-065
Geometrical and Numerical Considerations in Computing Advanced-Propeller Noise C93-064
Role of Leading-Edge Vortex Flows in Prop-Fan Interaction Noise C93-047
Aeroelastic Tailoring Analysis for Preliminary Design of Advanced Propellers with Composite Blades C93-018

Rotorcraft

Optimizing Tuning Masses for Helicopter Rotor Blade Vibration Reduction and Comparison with Test Data C93-152
Response of Helicopter Blades to a Sharp Collective Increase C93-150
Investigation of Rotor Tip Vortex Interactions with a Body C93-149
Selected Design Issues of Some High-Speed Rotorcraft Concepts C93-147
Forward Flight Trim and Frequency Response Validation of a Helicopter Simulation Model C93-146
Wake Structure of a Helicopter Rotor in Forward Flight C93-086
Transonic Blade-Vortex Interactions: Noise Reduction C93-072
Optimal Takeoff Procedures for a Transport Category Tiltrotor C93-053
Conceptual Assessment of Two High-Speed Rotorcraft C93-045
Optimal Takeoff of a Helicopter for Category A V/STOL Operations C93-044

Safety

Lightning Threat to Aircraft: Do We Know All We Need to Know? C93-033
Military Aircrew Head Support System C93-015
New Concept in Runback Water Modeling for Anti-Iced Aircraft Surfaces C93-006
Aerodynamic Effects of Aircraft Ground Deicing/Anti-Icing Fluids C93-004
Aircraft Ground Deicing, A Flight Crew Perspective C93-003
Development of an International Standard for Safe Winter Operation C93-002

Simulation

Visualization and View Simulation Based on Transputers C93-098
Special Rotation Vectors: A Means for Transmitting Quaternions in Three Components C93-029
Fountain Flows Produced by Multijet Impingement on a Ground Plane C93-007

Stealth

Fundamentals of Low Radar Cross-Sectional Aircraft Design C93-052

STOL/VTOL/STOVL

Ground Vortex Formed by Impinging Jets in Crossflow C93-148
Selected Design Issues of Some High-Speed Rotorcraft Concepts C93-147
Finite State Aeroelastic Model for Use in Rotor Design Optimization C93-130

Flapping Motion of a Planar Jet Impinging on a V-Shaped Plate C93-058
Optimal Takeoff Procedures for a Transport Category Tiltrotor C93-053
Conceptual Assessment of Two High-Speed Rotorcraft C93-045
Fountain Flows Produced by Multijet Impingement on a Ground Plane C93-007

Structural Design (Including Loads)

Fractional Order Calculus Model of the Generalized Theodorsen Function C93-165
Thermoacoustic Loads and Fatigue of Hypersonic Vehicle Skin Panels C93-160
Optimization of Joined-Wing Aircraft C93-151
Vortex Control Technique for the Attenuation of Fin Buffet C93-145
Computation of Maximized Gust Loads for Nonlinear Aircraft Using Matched-Filter-Based Schemes C93-128
Neutrally Reinforced Holes in Symmetrically Laminated Plates C93-081
Structural Analysis of Box Beams Using Symbolic Manipulation Technique C93-048
Formulation of Design Envelope Criterion in Terms of Deterministic Spectral Procedure C93-024
Wavelet Analysis of Gust Structure in Measured Atmospheric Turbulence Data C93-014

Structural Materials

Neutrally Reinforced Holes in Symmetrically Laminated Plates C93-081

Testing, Flight and Ground

Target Pitch Angle for the Microburst Escape Maneuver C93-142
Experimental Verification of a Wall Interference Correction Method with Interface Measurements C93-140
Envelope Function—A Tool for Analyzing Flutter Data C93-131
Ground Facility Interference on Aircraft Configurations with Separated Flow C93-117
DeHavilland Dash-8 Aircraft Airborne System Testing C93-104
Zero-Thrust Glide Testing for Drag and Propulsive Efficiency of Propeller Aircraft C93-091
Dynamic Stability Derivatives Evaluation in a Low-Speed Wind Tunnel C93-078
Evaluation and Extension of the Flutter-Margin Method for Flight Flutter Prediction C93-069
Vortex Generators Used to Control Laminar Separation Bubbles C93-057
Laminar-Flow Instrumentation for Wind-Tunnel and Flight Experiments C93-038
Total Least Squares Estimation of Aerodynamic Model Parameters from Flight Data C93-030
Computational Flowfields for Static Testing of Powered Hypersonic Aftbody Models C93-023
Improvement and Modernization of Subsonic Wind Tunnels C93-008

Vibration

Optimization of Aircraft Engine Suspension Systems C93-161
Optimizing Tuning Masses for Helicopter Rotor Blade Vibration Reduction and Comparison with Test Data C93-152
Envelope Function—A Tool for Analyzing Flutter Data C93-131

Weather Hazards

Efficient Finite Element Method for Aircraft Deicing Problems C93-119
Lightning Threat to Aircraft: Do We Know All We Need to Know? C93-033
Aerodynamic Effects of Aircraft Ground Deicing/Anti-Icing Fluids C93-004
Aircraft Ground Deicing, A Flight Crew Perspective C93-003
Development of an International Standard for Safe Winter Operation C93-002
Constrasting Requirements for Type II De/Anti-Icing Fluids C93-001

Fluid Dynamics

Aeroacoustics

Prediction of Fluctuating Pressure in Attached and Separated Turbulent Boundary-Layer Flow C93-159
Rotor Wake/Stator Interaction Noise—Predictions vs Data C93-123
Euler/Experiment Correlations of Sonic Boom Pressure Signatures C93-115
Approximate Method for the Prediction of Propeller Noise Near-Field Effects C93-107
Transonic Blade-Vortex Interactions: Noise Reduction C93-072
Geometrical and Numerical Considerations in Computing Advanced-Propeller Noise C93-064
Limitations of Linear Theory for Sonic Boom Calculations C93-056
Role of Leading-Edge Vortex Flows in Prop-Fan Interaction Noise C93-047
Cruise Noise of an Advanced Propeller with Swirl Recovery Vanes C93-042
Mechanisms of Transonic Blade-Vortex Interaction Noise C93-013
Sound Generation by Rotor-Vortex Interaction in Low Mach Number Flow C93-012
Sonic Boom Focal Zones from Tactical Aircraft Maneuvers C93-011

Boundary Layers and Heat Transfer—Turbulent

Eddy Viscosity-Entrainment Correlation C93-073
Nonequilibrium Turbulence Modeling Study on Light Dynamic Stall of a NACA0012 Airfoil C93-055

Boundary-Layer Stability and Transition

Vortex Generators Used to Control Laminar Separation Bubbles C93-057
Laminar-Flow Instrumentation for Wind-Tunnel and Flight Experiments C93-038
Stability Theory and Transition Prediction Applied to a General Aviation Fuselage C93-034

Computational Fluid Dynamics

Aerodynamic Shape Optimization Using Sensitivity Analysis on Third-Order Euler Equations C93-158
Numerical Prediction of Vortical Flow over Slender Delta Wings C93-156
Euler Code Prediction of Near-Field to Midfield Sonic Boom Pressure Signatures C93-153
Aerothermodynamic Properties of Hypersonic Flow over Radiation-Adiabatic Surfaces C93-144
Computational Study of Blowing on Delta Wings at High Alpha C93-143
Vortex Flow Control Using Fillets on a Double-Delta Wing C93-141
Navier-Stokes Investigation of Blunt Trailing-Edge Airfoils Using O Grids C93-135
Transonic Navier-Stokes Flow Computations over Wing-Fuselage Geometries C93-132
Efficient Simulation of Incompressible Viscous Flow over Single and Multielement Airfoils C93-124
Flowfield Simulation About the Stratospheric Observatory for Infrared Astronomy C93-122
Euler Analysis of Forebody-Strake Vortex Flows at Supersonic Speeds C93-105
Computational Effects of Inlet Representation on Powered Hypersonic, Airbreathing Models C93-103
Navier-Stokes Analysis of Three-Dimensional S-Ducts C93-094
Aerospace Plane Design Challenge: Credible Computations C93-093
Reynolds Number Effects on Supersonic Asymmetrical Flows over a Cone C93-089
Eddy Viscosity-Entrainment Correlation C93-073
Comparison of Two Navier-Stokes Codes for Simulating High-Incidence Vortical Flow C93-063
Computational Investigation of a Pneumatic Forebody Flow Control Concept C93-059
Nonequilibrium Turbulence Modeling Study on Light Dynamic Stall of a NACA0012 Airfoil C93-055
Multiblock Navier-Stokes Solutions About the F/A-18 Wing-LEX-Fuselage Configuration C93-054
Solution-Adaptive and Quality-Enhancing Grid Generation C93-043
Potential Hazard of Aircraft Wake Vortices in Ground Effect with Crosswind C93-039
Euler Study on Porous Transonic Airfoils with a View Toward Multipoint Design C93-037
PAN AIR Analysis of Simply Connected Control Surface Deflections C93-032
Computational Flowfields for Static Testing of Powered Hypersonic Aftbody Models C93-023
Nonunique Solutions in Unsteady Transonic Flow C93-020

Hypersonic Flow

Thermoacoustic Loads and Fatigue of Hypersonic Vehicle Skin Panels C93-160
Aerothermodynamic Properties of Hypersonic Flow over Radiation-Adiabatic Surfaces C93-144
Computational Effects of Inlet Representation on Powered Hypersonic, Airbreathing Models C93-103
Air Dissociation Effects on Aerodynamic Characteristics of an Aerospace Plane C93-097
Aerospace Plane Design Challenge: Credible Computations C93-093

Inlet, Nozzle, Diffusor, and Channel Flows

Aerodynamic Shape Optimization Using Sensitivity Analysis on Third-Order Euler Equations C93-158
Design Tradeoffs on Scramjet Engine Integrated Hypersonic Waverider Vehicles C93-157
CFD Analysis of the X-29 Inlet at High Angle of Attack C93-088
Mathematical Phenomenology for Thrust-Vectoring-Induced Agility Comparisons C93-046

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Ground Vortex Formed by Impinging Jets in Crossflow C93-148

Numerical Analysis of Supersonic Multijets C93-136
Navier-Stokes Investigation of Blunt Trailing-Edge Airfoils Using O Grids C93-135
Plume and Wake Dynamics, Mixing, and Chemistry Behind a High Speed Civil Transport Aircraft C93-087
Wake Structure of a Helicopter Rotor in Forward Flight C93-086
Permeable Airfoils in Incompressible Flow C93-077
Eddy Viscosity-Entrainment Correlation C93-073
Effects of Blowing on Delta Wing Vortices During Dynamic Pitching C93-060
Flapping Motion of a Planar Jet Impinging on a V-Shaped Plate C93-058

Reacting Flows and Combustion

Air Dissociation Effects on Aerodynamic Characteristics of an Aerospace Plane C93-097

Separated Flows

Computational Study of Blowing on Delta Wings at High Alpha C93-143
Effect of Leading-Edge Geometry on Delta Wing Unsteady Aerodynamics C93-133
Investigation of Vortex Development on a Pitching Slender Body of Revolution C93-121
Ground Facility Interference on Aircraft Configurations with Separated Flow C93-117
Euler Analysis of Forebody-Strake Vortex Flows at Supersonic Speeds C93-105
Navier-Stokes Analysis of Three-Dimensional S-Ducts C93-094
Slender Wing Rock Revisited C93-062
Schlieren Studies of Compressibility Effects on Dynamic Stall of Transiently Pitching Airfoils C93-041

Shock Waves and Detonations

Application of Oswatitsch's Theorem to Supercritical Airfoil Drag Calculation C93-075
Sonic Boom Focal Zones from Tactical Aircraft Maneuvers C93-011

Subsonic Flow

Numerical Prediction of Vortical Flow over Slender Delta Wings C93-156
Experimental Verification of a Wall Interference Correction Method with Interface Measurements C93-140
Aerodynamic Performance Effects due to Small Leading-Edge Ice (Roughness) on Wings and Tails C93-139
Effect of Leading-Edge Geometry on Delta Wing Unsteady Aerodynamics C93-133
Multielement Airfoil Performance due to Reynolds and Mach Number Variations C93-118
Experimental Study on the Aerodynamic Effects of a Forward-Sweep Angle C93-110
Unsteady Subsonic Aerodynamics for Bodies and Wings with External Stores Including Wake Effect C93-109
Induced Drag of a Crescent Wing Planform C93-106
Aerodynamic Calculation of Complex Three-Dimensional Configurations C93-102
Permeable Airfoils in Incompressible Flow C93-077
Experimental and Nonlinear Vortex Lattice Method Results for Various Wing-Canard Configurations C93-040
Effect of Viscous Drag on Optimum Spanwise Lift Distribution C93-031
Viscous Subsonic Flow Computation for Wings with Flaps for High-Lift C93-026
Sound Generation by Rotor-Vortex Interaction in Low Mach Number Flow C93-012

Supersonic Flow

Euler Code Prediction of Near-Field to Midfield Sonic Boom Pressure Signatures C93-153
Euler/Experiment Correlations of Sonic Boom Pressure Signatures C93-115
Euler Analysis of Forebody-Strake Vortex Flows at Supersonic Speeds C93-105
Limitations of Linear Theory for Sonic Boom Calculations C93-056
Supersonic Flutter of Laminated Thin Plates with Thermal Effects C93-016

Transonic Flow

Accuracy of Rational-Function Approximations for Linear Transonic Unsteady Aerodynamics C93-164
Transonic Airfoil Design by Constrained Optimization C93-138
Transonic Navier-Stokes Flow Computations over Wing-Fuselage Geometries C93-132
Experimental Study on the Aerodynamic Effects of a Forward-Sweep Angle C93-110
Application of Oswatitsch's Theorem to Supercritical Airfoil Drag Calculation C93-075
Euler Study on Porous Transonic Airfoils with a View Toward Multipoint Design C93-037
Transonic Flutter Analysis Using Time-Linearization Aerodynamics C93-027
Transonic Shock-Induced Dynamics of a Flexible Wing with a Thick Airfoil C93-017
Mechanisms of Transonic Blade-Vortex Interaction Noise C93-013

Unsteady Flows

Downwash Measurements on a Pitching Canard-Wing Configuration C93-166
Fractional Order Calculus Model of the Generalized Theodorsen Function C93-165
Accuracy of Rational-Function Approximations for Linear Transonic Unsteady Aerodynamics C93-164
Response of Helicopter Blades to a Sharp Collective Increase C93-150
Unsteady Pressure and Load Measurements on an F/A-18 Vertical Fin C93-127
Flowfield Simulation About the Stratospheric Observatory for Infrared Astronomy C93-122
Investigation of Vortex Development on a Pitching Slender Body of Revolution C93-121
Ground Facility Interference on Aircraft Configurations with Separated Flow C93-117
Application of Nonlinear Systems Theory to Transonic Unsteady Aerodynamic Responses C93-114
Numerical Simulation of Unsteady Flow Induced by a Flat Plate Moving Near Ground C93-108
Application of Leading-Edge Vortex Manipulations to Reduce Wing Rock Amplitudes C93-100
Time Domain Panel Method for Wings C93-083
Multiple Pole Rational-Function Approximations for Unsteady Aerodynamics C93-080
Unsteady Blade Pressures on a Propfan at Takeoff: Euler Analysis and Flight Data C93-065
Comparison of Two Navier-Stokes Codes for Simulating High-Incidence Vortical Flow C93-063
Slender Wing Rock Revisited C93-062
Indicial Lift Approximations for Two-Dimensional Subsonic Flow as Obtained from Oscillatory Measurements C93-061
Schlieren Studies of Compressibility Effects on Dynamic Stall of Transiently Pitching Airfoils C93-041
Transonic Flutter Analysis Using Time-Linearization Aerodynamics C93-027
Nonunique Solutions in Unsteady Transonic Flow C93-020
Transonic Shock-Induced Dynamics of a Flexible Wing with a Thick Airfoil C93-017
Flowfield in the Vicinity of an F/A-18 Vertical Fin at High Angles of Attack C93-010

Viscous Non-Boundary-Layer Flows

Aerothermodynamic Properties of Hypersonic Flow over Radiation-Adiabatic Surfaces C93-144

Vortices

Downwash Measurements on a Pitching Canard-Wing Configuration C93-166
Numerical Prediction of Vortical Flow over Slender Delta Wings C93-156
Vortex Control Technique for the Attenuation of Fin Buffet C93-145
Vortex Flow Control Using Fillets on a Double-Delta Wing C93-141
Effect of Leading-Edge Geometry on Delta Wing Unsteady Aerodynamics C93-133
Investigation of Vortex Development on a Pitching Slender Body of Revolution C93-121
Unsteady Wing Surface Pressures in the Wake of a Propeller C93-112
Induced Drag of a Crescent Wing Planform C93-106
Effects of Wing-Tip Vortex Flaps C93-101
Application of Leading-Edge Vortex Manipulations to Reduce Wing Rock Amplitudes C93-100
Navier-Stokes Analysis of Three-Dimensional S-Ducts C93-094
Reynolds Number Effects on Supersonic Asymmetrical Flows over a Cone C93-089
Plume and Wake Dynamics, Mixing, and Chemistry Behind a High Speed Civil Transport Aircraft C93-087
Vortex Breakdown Studies of a Canard-Configured X-31A-Like Fighter Aircraft Model C93-071
Comparison of Two Navier-Stokes Codes for Simulating High-Incidence Vortical Flow C93-063
Slender Wing Rock Revisited C93-062
Effects of Blowing on Delta Wing Vortices During Dynamic Pitching C93-060
Computational Investigation of a Pneumatic Forebody Flow Control Concept C93-059
Multiblock Navier-Stokes Solutions About the F/A-18 Wing-LEX-Fuselage Configuration C93-054
Potential Hazard of Aircraft Wake Vortices in Ground Effect with Crosswind C93-039
Mechanisms of Transonic Blade-Vortex Interaction Noise C93-013
Sound Generation by Rotor-Vortex Interaction in Low Mach Number Flow C93-012

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

Active Control of Aerothermoelastic Effects for a Conceptual Hypersonic Aircraft C93-085
Multiple Pole Rational-Function Approximations for Unsteady Aerodynamics C93-080
Mathematical Phenomenology for Thrust-Vectoring-Induced Agility Comparisons C93-046

Aircraft Stability and Control

Impact of Active Controls Technology on Structural Integrity C93-162
Identification of Actuation System and Aerodynamic Effects of Direct-Lift-Control Flaps C93-111
Aileron and Sideslip-Induced Unsteady Aerodynamic Modeling for Lateral Parameter Estimation C93-092
Measurements of Aerodynamic Rotary Stability Derivatives Using a Whirling Arm Facility C93-036
Passive Control of Delta Wing Rock C93-021

Computer Systems

Visualization and View Simulation Based on Transputers C93-098

Control Systems Design

Measurement and Improvement of the Lateral Agility of the F-18 C93-137

Control System Effectors

Effects of Wing-Tip Vortex Flaps C93-101

Control Theory

Optimal Cruise Performance C93-070

Dynamics

Optimization of Aircraft Engine Suspension Systems C93-161

Flight Mechanics

Forward Flight Trim and Frequency Response Validation of a Helicopter Simulation Model C93-146
Alternative Solution to Optimum Gliding Velocity in a Steady Head Wind or Tail Wind C93-134
Static Aeroelastic Control of an Adaptive Lifting Surface C93-095

Optimization Techniques

Optimizing Tuning Masses for Helicopter Rotor Blade Vibration Reduction and Comparison with Test Data C93-152
Alternative Solution to Optimum Gliding Velocity in a Steady Head Wind or Tail Wind C93-134
Optimal Cruise Performance C93-070
Simultaneous Structure/Control Design Optimization of a Wing Structure with a Gust Load Alleviation System C93-049

Structural Control

Passive Control of Delta Wing Rock C93-021

System Identification

Application of Nonlinear Systems Theory to Transonic Unsteady Aerodynamic Responses C93-114
Identification of Actuation System and Aerodynamic Effects of Direct-Lift-Control Flaps C93-111
Visualization and View Simulation Based on Transputers C93-098
Aileron and Sideslip-Induced Unsteady Aerodynamic Modeling for Lateral Parameter Estimation C93-092
Total Least Squares Estimation of Aerodynamic Model Parameters from Flight Data C93-030

Trajectory Optimization

Optimal Takeoff of a Helicopter for Category A V/STOL Operations C93-044

Interdisciplinary Topics

Aerospace Management

DeHavilland Dash-8 Aircraft Airborne System Testing C93-104

Analytical and Numerical Methods

Optimization of Aircraft Engine Suspension Systems C93-161
Finite State Aeroelastic Model for Use in Rotor Design Optimization C93-130
Vector Unsymmetric Eigenequation Solver for Nonlinear Flutter Analysis on High-Performance Computers C93-125
Method for Assessing the Electric Power System Reliability of Multiple-Engined Aircraft C93-074
Structural Analysis of Box Beams Using Symbolic Manipulation Technique C93-048
Special Rotation Vectors: A Means for Transmitting Quaternions in Three Components C93-029

Atmospheric and Space Sciences

Formulation of Design Envelope Criterion in Terms of Deterministic Spectral Procedure C93-024
Wavelet Analysis of Gust Structure in Measured Atmospheric Turbulence Data C93-014

Lasers and Laser Applications

Flowfield Simulation About the Stratospheric Observatory for Infrared Astronomy C93-122

Reliability, Maintainability, and Logistics Support

Method for Assessing the Electric Power System Reliability of Multiple-Engined Aircraft C93-074

Research Facilities and Instrumentation

Improvement and Modernization of Subsonic Wind Tunnels C93-008

Safety

Method for Assessing the Electric Power System Reliability of Multiple-Engined Aircraft C93-074
Constrasting Requirements for Type II De/Anti-Icing Fluids C93-001

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Computational Method for Matching Aerodynamic Experimental Data with Theoretical Influence Matrices C93-022

Propulsion

Airbreathing Propulsion

In-Flight Source Noise of an Advanced Large-Scale Single-Rotation Propeller C93-154
Rotor Wake/Stator Interaction Noise—Predictions vs Data C93-123
CFD Analysis of the X-29 Inlet at High Angle of Attack C93-088
Cruise Noise of an Advanced Propeller with Swirl Recovery Vanes C93-042

Environmental Effects

Plume and Wake Dynamics, Mixing, and Chemistry Behind a High Speed Civil Transport Aircraft C93-087
New Concept in Runback Water Modeling for Anti-Iced Aircraft Surfaces C93-006

Ramjets and Scramjets

Design Tradeoffs on Scramjet Engine Integrated Hypersonic Waverider Vehicles C93-157

Structural Mechanics and Materials

Aeroelasticity and Control

Finite Element Nonlinear Flutter and Fatigue Life of Two-Dimensional Panels with Temperature Effects C93-163
Impact of Active Controls Technology on Structural Integrity C93-162
Unsteady Pressure and Load Measurements on an F/A-18 Vertical Fin C93-127
Vector Unsymmetric Eigenequation Solver for Nonlinear Flutter Analysis on High-Performance Computers C93-125
Response of B-2 Aircraft to Nonuniform Spanwise Turbulence C93-113
Use of Eigenvectors in the Solution of the Flutter Equation C93-099
Static Aeroelastic Control of an Adaptive Lifting Surface C93-095
Sensitivity Analysis of a Wing Aeroelastic Response C93-090
Active Control of Aerothermoelastic Effects for a Conceptual Hypersonic Aircraft C93-085
Time Domain Panel Method for Wings C93-083
Shape Sensitivities and Approximations of Modal Response of Laminated Skew Plates C93-079
Integrated Structure/Control/Aerodynamic Synthesis of Actively Controlled Composite Wings C93-068
Supersonic Flutter of Laminated Thin Plates with Thermal Effects C93-016
Flowfield in the Vicinity of an F/A-18 Vertical Fin at High Angles of Attack C93-010

Flexible and Active Structures

Static Aeroelastic Control of an Adaptive Lifting Surface C93-095

Materials Structural Properties

Generation of MIL-HDBK-5 Design Allowables for Aramid/Aluminum Laminates C93-050

Structural Composite Materials

Analytical-Experimental Investigation of Free-Vibration Characteristics of Rotating Composite I-Beams C93-155
Stringer Peeling Effects at Stiffened Composite Panels in the Postbuckling Range C93-129
Shape Sensitivities and Approximations of Modal Response of Laminated Skew Plates C93-079
Generation of MIL-HDBK-5 Design Allowables for Aramid/Aluminum Laminates C93-050
Coupled Deflection and Rotation of Anisotropic Open-Section Composite Stiffeners C93-025

Supersonic Flutter of Laminated Thin Plates with Thermal Effects **C93-016**

Structural Design

Effect of Stiffness Characteristics on the Response of Composite Grid-Stiffened Structures **C93-096**
Sensitivity Analysis of a Wing Aeroelastic Response **C93-090**
Generation of MIL-HDBK-5 Design Allowables for Aramid/Aluminum Laminates **C93-050**
Coupled Deflection and Rotation of Anisotropic Open-Section Composite Stiffeners **C93-025**
Aeroelastic Tailoring Analysis for Preliminary Design of Advanced Propellers with Composite Blades **C93-018**

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

Monitoring Load Experience of Individual Aircraft **C93-126**
Damage Tolerance Assessment of the Fighter Aircraft 37 Viggen Main Wing Attachment **C93-066**
Overview of NASA Research Related to the Aging Commercial Transport Fleet **C93-009**

Structural Dynamics and Characterization

Analytical-Experimental Investigation of Free-Vibration Characteristics of Rotating Composite I-Beams **C93-155**
Response of Helicopter Blades to a Sharp Collective Increase **C93-150**
Envelope Function—A Tool for Analyzing Flutter Data **C93-131**
Unsteady Pressure and Load Measurements on an F/A-18 Vertical Fin **C93-127**
Flowfield in the Vicinity of an F/A-18 Vertical Fin at High Angles of Attack **C93-010**

Structural Finite Elements

Stringer Peeling Effects at Stiffened Composite Panels in the Postbuckling Range **C93-129**
Structural Analysis of Box Beams Using Symbolic Manipulation Technique **C93-048**

Structural Modeling

Analytical-Experimental Investigation of Free-Vibration Characteristics of Rotating Composite I-Beams **C93-155**
Sensitivity-Based Scaling for Approximating Structural Response **C93-051**
Coupled Deflection and Rotation of Anisotropic Open-Section Composite Stiffeners **C93-025**

Structural Optimization

Finite State Aeroelastic Model for Use in Rotor Design Optimization **C93-130**
Sensitivity Analysis of a Wing Aeroelastic Response **C93-090**
Shape Sensitivities and Approximations of Modal Response of Laminated Skew Plates **C93-079**
Integrated Structure/Control/Aerodynamic Synthesis of Actively Controlled Composite Wings **C93-068**
Sensitivity-Based Scaling for Approximating Structural Response **C93-051**
Simultaneous Structure/Control Design Optimization of a Wing Structure with a Gust Load Alleviation System **C93-049**

Structural Stability

Stringer Peeling Effects at Stiffened Composite Panels in the Postbuckling Range **C93-129**
Effect of Stiffness Characteristics on the Response of Composite Grid-Stiffened Structures **C93-096**
Active Control of Aerothermoelastic Effects for a Conceptual Hypersonic Aircraft **C93-085**

Thermophysics and Heat Transfer

Heat Conduction

Efficient Finite Element Method for Aircraft Deicing Problems **C93-119**

Melting/Solidification

Efficient Finite Element Method for Aircraft Deicing Problems **C93-119**

Thermal Modeling and Analysis

New Concept in Runback Water Modeling for Anti-Iced Aircraft Surfaces **C93-006**

Chronological Index

C91-017 Equation Decoupling—A New Approach to the Aerodynamic Identification of Unstable Aircraft. Harald Preissler and Horst Schäufele, *Messerschmidt-Bölkow-Blohm GmbH, Germany* (**28**, 2, p. 146) Article based on AIAA Paper 90-1276

Technical Comment by Li Naihong, Wu Yaohua and Cui Pingyuan, *Harbin Institute of Technology, PRC* (**30**, 3, p. 431)

C91-041 In-Flight Measurement of Static Pressures and Boundary-Layer State with Integrated Sensors. E. Greff, *Messerschmidt-Bölkow-Blohm GmbH, Germany* (**28**, 5, p. 289) Article based on AIAA Paper 91-0759

Technical Comment by Dennis G. Mabey, *Imperial College, England, UK* (**30**, 3, p. 432)

Reply (**30**, 3, p. 432)

C93-001 Constrasting Requirements for Type II De/Anti-Icing Fluids. J. F. Ross and J. T. Connolly, *Kilfrost Limited, England, UK* (**30**, 1, p. 10) Article based on AIAA Paper 91-0759

C93-002 Development of an International Standard for Safe Winter Operation. R. Hornig, *Lufthansa German Airlines* (**30**, 1, p. 14) Article based on AIAA Paper 91-0758

C93-003 Aircraft Ground Deicing, A Flight Crew Perspective. David J. Haase, *Air Line Pilots Association* (**30**, 1, p. 19) Article based on AIAA Paper 91-0761

C93-004 Aerodynamic Effects of Aircraft Ground Deicing/Anti-Icing Fluids. Eugene G. Hill and Thomas A. Zierten, *Boeing Commerical Airplane Group* (**30**, 1, p. 24) Article based on AIAA Paper 91-0762

C93-005 Aerodynamic Effects of Ground De/Anti-Icing Fluids on Fokker 50 and Fokker 100. J. van Hengst, *Fokker Aircraft B. V., The Netherlands* (**30**, 1, p. 35) Article based on AIAA Paper 91-0785

C93-006 New Concept in Runback Water Modeling for Anti-Iced Aircraft Surfaces. Kamel M. Al-Khalil, *National Research Council*; Theo G. Keith Jr. and Kenneth J. De Witt, *University of Toledo* (**30**, 1, p. 41) Article based on AIAA Paper 91-0266

C93-007 Fountain Flows Produced by Multijet Impingement on a Ground Plane. J. M. M. Barata, *Instituto Superior Técnico, Portugal* (**30**, 1, p. 50) Article based on AIAA Paper 91-1806

C93-008 Improvement and Modernization of Subsonic Wind Tunnels. T. Wolf, *Technical University of Darmstadt, Germany* (**30**, 1, p. 57) Article based on AIAA Paper 90-1423

C93-009 Overview of NASA Research Related to the Aging Commercial Transport Fleet. Charles E. Harris and Joseph S. Heyman, *NASA Langley Research Center* (**30**, 1, p. 64) Article based on AIAA Paper 91-0952 CP911

C93-010 Flowfield in the Vicinity of an F/A-18 Vertical Fin at High Angles of Attack. B. H. K. Lee, D. Brown, F. C. Tang and M. Plosenski, *Institute for Aerospace Research, Canada* (**30**, 1, p. 69) Article

C93-011 Sonic Boom Focal Zones from Tactical Aircraft Maneuvers. Kenneth J. Plotkin, *Wyle Laboratories* (**30**, 1, p. 75) Article based on AIAA Paper 90-4003

C93-012 Sound Generation by Rotor-Vortex Interaction in Low Mach Number Flow. F. Obermeier and K.-Q. Zhu, *Max-Planck-Institut für Strömungsforschung, Germany* (**30**, 1, p. 81) Article based on AIAA Paper 90-3974

C93-013 Mechanisms of Transonic Blade-Vortex Interaction Noise. H.-M. Lent, G. E. A. Meier, K. J. Müller, F. Obermeier, U. Schievelbusch and O. Schürmann, *Max-Planck-Institut für Strömungsforschung, Germany* (**30**, 1, p. 88) Article based on AIAA Paper 90-3972

C93-014 Wavelet Analysis of Gust Structure in Measured Atmospheric Turbulence Data. J. G. Jones, G. W. Foster and P. G. Earwicker, *Defense Research Agency, RAE Farnborough, England, UK* (**30**, 1, p. 94) Article based on AIAA Paper 91-0448

C93-015 Military Aircrew Head Support System. R. S. Deakin, *British Aerospace (Military Aircraft), Ltd., England, UK* (**30**, 1, p. 100) Article

C93-016 Supersonic Flutter of Laminated Thin Plates with Thermal Effects. D. G. Liaw, *Sverdrup Technology, Inc.* (**30**, 1, p. 105) Article

C93-017 Transonic Shock-Induced Dynamics of a Flexible Wing with a Thick Airfoil. Robert M. Bennett, Bryan E. Dansberry, Moses G. Farmer, Clinton V. Eckstrom, David A. Seidel and José A. Rivera Jr., *NASA Langley Research Center* (**30**, 1, p. 112) Article based on AIAA Paper 91-1107 CP911

C93-018 Aeroelastic Tailoring Analysis for Preliminary Design of Advanced Propellers with Composite Blades. Takashi Yamane, *Mechanical Engineering Laboratory, Japan*; and Peretz P. Friedmann, *University of California, Los Angeles* (**30**, 1, p. 119) Article based on AIAA Paper 90-1160 CP902

C93-019 Fastest Climb of a Turbojet Aircraft. Shiva Kumar Ojha, *Indian Institute of Technology* (**30**, 1, p. 127) Engineering Note

C93-020 Nonunique Solutions in Unsteady Transonic Flow. H. S. Murty, *University of Ottawa, Canada* (**30**, 1, p. 129) Engineering Note

C93-021 Passive Control of Delta Wing Rock. Costas Emmanuel Synolakis, Brett D. Breuel, Murali Tegulapalle and Chih-Ming Ho, *University of Southern California* (**30**, 1, p. 131) Engineering Note

C93-022 Computational Method for Matching Aerodynamic Experimental Data with Theoretical Influence Matrices. Claudio Ponzi, *Alenia, Italy* (**30**, 1, p. 133) Engineering Note

C93-023 Computational Flowfields for Static Testing of Powered Hypersonic Aftbody Models. Lawrence D. Huebner, *NASA Langley Research Center* (**30**, 1, p. 135) Engineering Note based on AIAA Paper 91-1709

C93-024 Formulation of Design Envelope Criterion in Terms of Deterministic Spectral Procedure. J. G. Jones, *Defence Research Agency, RAE Farnborough, England, UK* (**30**, 1, p. 137) Engineering Note

C93-025 Coupled Deflection and Rotation of Anisotropic Open-Section Composite Stiffeners. Lawrence C. Bank and Emmanuel Cofie, *Catholic University of America* (**30**, 1, p. 139) Engineering Note based on AIAA Paper 91-1022 CP911

C93-026 Viscous Subsonic Flow Computation for Wings with Flaps for High-Lift. H. N. V. Dutt, *NAL Bangalore, India*; and K. Jacob, *DLR Goettingen, Germany* (**30**, 1, p. 141) Engineering Note

C93-027 Transonic Flutter Analysis Using Time-Linearization Aerodynamics. Y. S. Wong, *University of Alberta, Canada*; B. H. K. Lee, *National Research Council, Canada*; and H. S. Murty, *University of Ottawa, Canada* (**30**, 1, p. 144) Engineering Note

C93-028 Fastest Climb of a Piston-Prop Aircraft. Shiva Kumar Ojha, *Indian Institute of Technology* (**30**, 1, p. 146) Engineering Note

C93-029 Special Rotation Vectors: A Means for Transmitting Quaternions in Three Components. Ammon Katz, *University of Alabama* (**30**, 1, p. 148) Engineering Note

C93-030 Total Least Squares Estimation of Aerodynamic Model Parameters from Flight Data. Martin Laban and Kazuya Masui, *Delft University of Technology, The Netherlands* (**30**, 1, p. 150) Engineering Note

C93-031 Effect of Viscous Drag on Optimum Spanwise Lift Distribution. Kamran Rokhsaz, *Wichita State University* (**30**, 1, p. 152) Engineering Note based on AIAA Paper 92-0287

C93-032 PAN AIR Analysis of Simply Connected Control Surface Deflections. Seth A. Moyer, *Naval Air Warfare Center* (**30**, 1, p. 154) Engineering Note

C93-033 Lightning Threat to Aircraft: Do We Know All We Need to Know? Vladislav Mazur, *NOAA/National Severe Storms Laboratory* (**30**, 1, p. 156) Engineering Note

C93-034 Stability Theory and Transition Prediction Applied to a General Aviation Fuselage. R. E. Spall, *University of South Alabama*; and Y.-S. Wie, *High Technology Corporation* (**30**, 2, p. 161) Article

C93-035 Regional Fanjet Aircraft Optimization Studies. Lloyd R. Jenkinson, *University of Technology, England, UK* (**30**, 2, p. 168) Article based on AIAA Paper 91-3081

C93-036 Measurements of Aerodynamic Rotary Stability Derivatives Using a Whirling Arm Facility. Marc J. M. Mulkens and Albert O. Ormerod, *Cranfield Institute of Technology, England, UK* (**30**, 2, p. 178) Article

C93-037 Euler Study on Porous Transonic Airfoils with a View Toward Multipoint Design. Peter M. Hartwich, *ViGYAN, Inc.* (**30**, 2, p. 184) Article based on AIAA Paper 91-3286 CP918

C93-038 Laminar-Flow Instrumentation for Wind-Tunnel and Flight Experiments. Wolfgang Nitsche, *Technical University of Berlin, Germany*; and Joachim Szodruch, *Airbus Industrie, France* (**30**, 2, p. 192) Article

C93-039 Potential Hazard of Aircraft Wake Vortices in Ground Effect with Crosswind. Robert E. Robins and Donald P. Delisi, *Northwest Research Associates, Inc.* (**30**, 2, p. 201) Article based on AIAA Paper 89-3400 CP898

C93-040 Experimental and Nonlinear Vortex Lattice Method Results for Various Wing-Canard Configurations. J. Rom, B. Melamed and D. Almosnino, *Technion—Israel Institute of Technology* (**30**, 2, p. 207) Article

C93-041 Schlieren Studies of Compressibility Effects on Dynamic Stall of Transiently Pitching Airfoils. M. S. Chandrasekhara, *Naval Postgraduate School*; S. Ahmed, *MCAT Institute*; and L. W. Carr, *NASA Ames Research Center* (**30**, 2, p. 213) Article based on AIAA Paper 90-3038 CP908

C93-042 Cruise Noise of an Advanced Propeller with Swirl Recovery Vanes. James H. Dittmar, *NASA Lewis Research Center*; and David G. Hall, *Sverdrup Technology, Inc.* (**30**, 2, p. 221) Article based on AIAA Paper 90-3932

C93-043 Solution-Adaptive and Quality-Enhancing Grid Generation. Phu V. Luong, Joe F. Thompson and Boyd Gatlin, *Mississippi State University* (**30**, 2, p. 227) Article based on AIAA Paper 91-1593 CP914

C93-044 Optimal Takeoff of a Helicopter for Category A V/STOL Operations. Yoshinori Okuno, *National Aerospace Laboratory, Japan*; and Keiji Kawachi, *University of Tokyo, Japan* (**30**, 2, p. 235) Article

C93-045 Conceptual Assessment of Two High-Speed Rotorcraft. John W. Rutherford, Matthew J. O'Rourke, Marc A. Lovenguth and Clark A. Mitchell, *McDonnell Douglas Helicopter Company* (**30**, 2, p. 241) Article

C93-046 Mathematical Phenomenology for Thrust-Vectoring-Induced Agility Comparisons. Benjamin Gal-Or, *Technion—Israel Institute of Technology*; and Daniel D. Baumann, *Flight Dynamics Directorate, Wright-Patterson AFB* (**30**, 2, p. 248) Article

C93-047 Role of Leading-Edge Vortex Flows in Prop-Fan Interaction Noise. J. C. Simonich, D. C. McCormick and P. L. Lavrich, *United Technologies Research Center* (**30**, 2, p. 255) Article based on AIAA Paper 89-1093

C93-048 Structural Analysis of Box Beams Using Symbolic Manipulation Technique. M. Sathyamoorthy and Ravindra Sirigiri, *Clarkson University* (**30**, 2, p. 262) Article

C93-049 Simultaneous Structure/Control Design Optimization of a Wing Structure with a Gust Load Alleviation System. Shinji Suzuki, *University of Tokyo, Japan*; and Satoshi Yonezawa, *Kobe Steel, Ltd., Japan*(**30**, 2, p. 268) Article

C93-050 Generation of MIL-HDBK-5 Design Allowables for Aramid/Aluminum Laminates. H. F. Wu, R. J. Bucci and R. H. Wygonik, *Alcoa Technical Center*; and R. C. Rice, *Battelle* (**30**, 2, p. 275) Article

C93-051 Sensitivity-Based Scaling for Approximating Structural Response. Kwan J. Chang, *Lockheed Engineering and Science Company*; Raphael T. Haftka, *Virginia Polytechnic Institute and State University*; Gary L. Giles, *NASA Langley Research Center*; and Pi-Jen Kao, *Analytical Services and Materials, Inc.* (**30**, 2, p. 283) Article based on AIAA Paper 91-0925 CP911

C93-052 Fundamentals of Low Radar Cross-Sectional Aircraft Design. Alan C. Brown, *Lockheed Corporation* (**30**, 3, p. 289) Synoptic

C93-053 Optimal Takeoff Procedures for a Transport Category Tiltrotor. Yoshinori Okuno, *National Aerospace Laboratory, Japan*; and Keiji Kawachi, *University of Tokyo, Japan* (**30**, 3, p. 291) Synoptic

C93-054 Multiblock Navier-Stokes Solutions About the F/A-18 Wing-LEX-Fuselage Configuration. Farhad Ghaffari, James M. Luckring and James L. Thomas, *NASA Langley Research Center*; Brent L. Bates, *Vigyan, Inc.*; and Robert T. Biedron, *Analytical Services and Materials, Inc.* (**30**, 3, p. 293) Article based on AIAA Paper 91-3291 CP918

C93-055 Nonequilibrium Turbulence Modeling Study on Light Dynamic Stall of a NACA0012 Airfoil. Mustafa Dindar and Ünver Kaynak, *TUSAS Aerospace Industries, Turkey*; and Kozo Fujii, *Institute of Space and Astronautical Science, Japan* (**30**, 3, p. 304) Article based on AIAA Paper 90-3040 CP908

C93-056 Limitations of Linear Theory for Sonic Boom Calculations. Christine M. Darden, *NASA Langley Research Center* (**30**, 3, p. 309) Article based on AIAA Paper 90-0368

C93-057 Vortex Generators Used to Control Laminar Separation Bubbles. M. Kerho, S. Hutcherson, R. F. Blackwelder and R. H. Liebeck, *University of Southern California* (**30**, 3, p. 315) Article based on AIAA Paper 90-0051

C93-058 Flapping Motion of a Planar Jet Impinging on a V-Shaped Plate. Cheng-Kuang Lin, *Chung Shan Institute of Science and Technology, Taiwan, ROC*; Fei-Bin Hsiao and Shyh-Shiun Sheu, *National Cheng Kung University, Taiwan, ROC* (**30**, 3, p. 320) Article

C93-059 Computational Investigation of a Pneumatic Forebody Flow Control Concept. Ken Gee, *MCAT Institute*; Domingo Tavella, *Stanford University*; and Lewis B. Schiff, *NASA Ames Research Center* (**30**, 3, p. 326) Article based on AIAA Paper 91-3249 CP918

C93-060 Effects of Blowing on Delta Wing Vortices During Dynamic Pitching. L. Scott Miller, *Wichita State University*; and Brenda E. Gile, *NASA Langley Research Center* (**30**, 3, p. 334) Article based on AIAA Paper 92-0407

C93-061 Indicial Lift Approximations for Two-Dimensional Subsonic Flow as Obtained from Oscillatory Measurements. J. G. Leishman, *University of Maryland at College Park* (**30**, 3, p. 340) Article

C93-062 Slender Wing Rock Revisited. Lars E. Ericsson, *Lockheed Missiles and Space Company, Inc.* (**30**, 3, p. 352) Article based on AIAA Paper 90-0417

C93-063 Comparison of Two Navier-Stokes Codes for Simulating High-Incidence Vortical Flow. Neal M. Chaderjian, *NASA Ames Research Center* (**30**, 3, p. 357) Article based on AIAA Paper 91-0175

C93-064 Geometrical and Numerical Considerations in Computing Advanced-Propeller Noise. Valana L. Wells and Arris Han, *Arizona State University* (**30**, 3, p. 365) Article based on AIAA Paper 90-3997

C93-065 Unsteady Blade Pressures on a Propfan at Takeoff: Euler Analysis and Flight Data. M. Nallasamy, *Sverdrup Technology, Inc.* (**30**, 3, p. 372) Article based on AIAA Paper 92-0376

C93-066 Damage Tolerance Assessment of the Fighter Aircraft 37 Viggen Main Wing Attachment. Björn Palmberg, Mats-Olof Olsson, Per-Olof Boman and Anders F. Blom, *FFA Aeronautical Research Institute of Sweden* (**30**, 3, p. 377) Article

C93-067 Extended Range Operations of Two and Three Turbofan Engined Airplanes. Rodrigo Martínez-Val and Emilio Pérez, *Universidad Politecnica de Madrid, Spain* (**30**, 3, p. 382) Article

C93-068 Integrated Structure/Control/Aerodynamic Synthesis of Actively Controlled Composite Wings. E. Livne, *University of Washington*; L. A. Schmit and P. P. Friedmann, *University of California, Los Angeles* (**30**, 3, p. 387) Article

C93-069 Evaluation and Extension of the Flutter-Margin Method for Flight Flutter Prediction. S. J. Price, *McGill University, Canada*; and B. H. K. Lee, *Institute for Aerospace Research, Canada* (**30**, 3, p. 395) Article based on AIAA Paper 92-2101 CP923

C93-070 Optimal Cruise Performance. L. Earl Miller, *University of Dayton* (**30**, 3, p. 403) Engineering Note

C93-071 Vortex Breakdown Studies of a Canard-Configured X-31A-Like Fighter Aircraft Model. Sheshagiri K. Hebbar and Max F. Platzer, *Naval Postgraduate School*; and Hui Man Kwon, *Korean Air Force* (**30**, 3, p. 405) Engineering Note based on AIAA Paper 91-1629 CP914

C93-072 Transonic Blade-Vortex Interactions: Noise Reduction. Y. Xue and A. S. Lyrintzis, *University of Minnesota* (**30**, 3, p. 408) Engineering Note

C93-073 Eddy Viscosity-Entrainment Correlation. H. Dumitrescu, S. Ion and Al. Dumitrache, *Institute of Applied Mathematics of the Romanian Academy* (**30**, 3, p. 411) Engineering Note

C93-074 Method for Assessing the Electric Power System Reliability of Multiple-Engined Aircraft. Hsing-Juin Lee, *National Chung-Hsing University, Taiwan, ROC*; and Hsing-Wei Lee, *Chung-Cheng Institute of Technology, Taiwan, ROC* (**30**, 3, p. 413) Engineering Note

C93-075 Application of Oswatitsch's Theorem to Supercritical Airfoil Drag Calculation. G. R. Inger, *Iowa State University* (**30**, 3, p. 415) Engineering Note based on AIAA Paper 91-3210 CP918

C93-076 Theodorsen's Ideal Propeller Performance with Ambient Pressure in the Slipstream. Gerrit Schouten, *Delft University of Technology, The Netherlands* (**30**, 3, p. 417) Engineering Note

C93-077 Permeable Airfoils in Incompressible Flow. Virgil M. Musat, *Institute of Applied Mathematics of the Romanian Academy, France* (**30**, 3, p. 419) Engineering Note

C93-078 Dynamic Stability Derivatives Evaluation in a Low-Speed Wind Tunnel. G. Guglieri, *National Research Council, Italy*; and F. B. Quagliotti, *Turin Polytechnic Institute, Italy* (**30**, 3, p. 421) Engineering Note based on AIAA Paper 91-3245 CP918

C93-079 Shape Sensitivities and Approximations of Modal Response of Laminated Skew Plates. Sarvesh Singhvi and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**30**, 3, p. 423) Engineering Note based on AIAA Paper 92-2391 CP922

C93-080 Multiple Pole Rational-Function Approximations for Unsteady Aerodynamics. Ashish Tewari, *National Aeronautical Laboratory, India*; and Jan Brink-Spalink, *Deutsche Airbus GmbH, Germany* (**30**, 3, p. 426) Engineering Note

C93-081 Neutrally Reinforced Holes in Symmetrically Laminated Plates. E. Senocak and A. M. Waas, *University of Michigan* (**30**, 3, p. 428) Engineering Note based on AIAA Paper 92-2486 CP922

C93-082 S-Plane Aerodynamics of Nonplanar Lifting Surfaces. Jinsoo Cho, *Pohang Institute of Science and Technology, Republic of Korea*; and Marc H. Williams, *Purdue University* (**30**, 4, p. 433) Article

C93-083 Time Domain Panel Method for Wings. Max Blair, *Wright Research and Development Center*; and Marc H. Williams, *Purdue University* (**30**, 4, p. 439) Article based on AIAA Paper 89-1323 CP891

C93-084 Computation of Induced Drag for Elliptical and Crescent-Shaped Wings. Stephen C. Smith, *NASA Ames Research Center*; and Ilan M. Kroo, *Stanford University* (**30**, 4, p. 446) Article based on AIAA Paper 90-3063 CP908

C93-085 Active Control of Aerothermoelastic Effects for a Conceptual Hypersonic Aircraft. Jennifer Heeg and Michael G. Gilbert, *NASA Langley Research Center*; and Anthony S. Pototzky, *Lockheed Engineering and Sciences Company* (**30**, 4, p. 453) Article based on AIAA Paper 90-3337 CP909

C93-086 Wake Structure of a Helicopter Rotor in Forward Flight. G. Briassulis and J. Andreopoulos, *City College of the City University of New York* (**30**, 4, p. 459) Article based on AIAA Paper 91-1753

C93-087 Plume and Wake Dynamics, Mixing, and Chemistry Behind a High Speed Civil Transport Aircraft. R. C. Miake-Lye, M. Martinez-Sanchez, R. C. Brown and C. E. Kolb, *Aerodyne Research, Inc.* (**30**, 4, p. 467) Article based on AIAA Paper 91-3158

C93-088 CFD Analysis of the X-29 Inlet at High Angle of Attack. R. H. Tindell and W. G. Hill Jr., *Grumman Corporation* (**30**, 4, p. 480) Article

C93-089 Reynolds Number Effects on Supersonic Asymmetrical Flows over a Cone. J. L. Thomas, *NASA Langley Research Center* (**30**, 4, p. 488) Article based on AIAA Paper 91-3295 CP918

C93-090 Sensitivity Analysis of a Wing Aeroelastic Response. Rakesh K. Kapania and Lloyd B. Eldred, *Virginia Polytechnic Institute and State University*; and Jean-François M. Barthelemy, *NASA Langley Research Center* (**30**, 4, p. 496) Article based on AIAA Paper 91-1103 CP911

C93-091 Zero-Thrust Glide Testing for Drag and Propulsive Efficiency of Propeller Aircraft. Jack Norris; and Andrew B. Bauer, *Douglas Aircraft Company* (**30**, 4, p. 505) Article based on AIAA Paper 90-0233

C93-092 Aileron and Sideslip-Induced Unsteady Aerodynamic Modeling for Lateral Parameter Estimation. Jatinder Singh and S. C. Raisinghani, *Indian Institute of Technology* (**30**, 4, p. 512) Article

C93-093 Aerospace Plane Design Challenge: Credible Computations. Unmeel B. Mehta, *NASA Ames Research Center* (**30**, 4, p. 519) Article based on AIAA Paper 90-5248
Errata (**30**, 6, p. 1009)

C93-094 Navier-Stokes Analysis of Three-Dimensional S-Ducts. G. J. Harloff, C. F. Smith, J. E. Bruns and J. R. DeBonis, *Sverdrup Technology, Inc.* (**30**, 4, p. 526) Article

C93-095 Static Aeroelastic Control of an Adaptive Lifting Surface. S. M. Ehlers, *McDonnell Douglas Technologies, Inc.*; and T. A. Weisshaar, *Purdue University* (**30**, 4, p. 534) Article based on AIAA Paper 90-1078 CP902

C93-096 Effect of Stiffness Characteristics on the Response of Composite Grid-Stiffened Structures. Damodar R. Ambur, *NASA Langley Research Center*; and Lawrence W. Rehfield, *University of California, Davis* (**30**, 4, p. 541) Article based on AIAA Paper 91-1087 CP911

C93-097 Air Dissociation Effects on Aerodynamic Characteristics of an Aerospace Plane. V. Ya. Neyland, *Central Aerohydrodynamic Institute (TsAGI), Russia* (**30**, 4, p. 547) Engineering Note

C93-098 Visualization and View Simulation Based on Transputers. Klaus Alvermann, *Institute for Flight Mechanics, Germany* (**30**, 4, p. 550) Engineering Note

C93-099 Use of Eigenvectors in the Solution of the Flutter Equation. Louw H. van Zyl, *AEROTEK, CSIR, South Africa* (**30**, 4, p. 553) Engineering Note

C93-100 Application of Leading-Edge Vortex Manipulations to Reduce Wing Rock Amplitudes. James Walton and Joseph Katz, *San Diego State University* (**30**, 4, p. 555) Engineering Note based on AIAA Paper 92-0279

C93-101 Effects of Wing-Tip Vortex Flaps. Lance W. Traub and Alan Nurick, *University of the Witwatersrand, South Africa* (**30**, 4, p. 557) Engineering Note

C93-102 Aerodynamic Calculation of Complex Three-Dimensional Configurations. F. Roggero and R. Larguier, *Office National d'Etudes et de Recherches Aérospatiales, France* (**30**, 5, p. 561) Article

C93-103 Computational Effects of Inlet Representation on Powered Hypersonic, Airbreathing Models. Lawrence D. Huebner, *NASA Langley Research Center*; and Kenneth E. Tatum, *Lockheed Engineering and Sciences Company* (**30**, 5, p. 571) Article

C93-104 DeHavilland Dash-8 Aircraft Airborne System Testing. S. P. Herrlinger, *USAF Air Warfare Center* (**30**, 5, p. 578) Article based on AIAA Paper 91-3172

C93-105 Euler Analysis of Forebody-Strake Vortex Flows at Supersonic Speeds. O. J. Rose, *Lockheed Engineering & Sciences Company*; and James L. Pittman, *NASA Langley Research Center* (**30**, 5, p. 586) Article based on AIAA Paper 89-0343

C93-106 Induced Drag of a Crescent Wing Planform. F. Lam and D. J. Maull, *University of Cambridge, England, UK* (**30**, 5, p. 594) Article

C93-107 Approximate Method for the Prediction of Propeller Noise Near-Field Effects. N. Peake, *University of Cambridge, England, UK*; and W. K. Boyd, *Rolls-Royce plc., England, UK* (**30**, 5, p. 603) Article based on AIAA Paper 90-3998

C93-108 Numerical Simulation of Unsteady Flow Induced by a Flat Plate Moving Near Ground. A. O. Nuhait and M. F. Zedan, *King Saud University, Saudi Arabia* (**30**, 5, p. 611) Article

C93-109 Unsteady Subsonic Aerodynamics for Bodies and Wings with External Stores Including Wake Effect. P. C. Chen, *ZONA Technology, Inc.*; H. W. Lee and D. D. Liu, *Arizona State University* (**30**, 5, p. 618) Article

C93-110 Experimental Study on the Aerodynamic Effects of a Forward-Sweep Angle. Giovanni Lombardi, *University of Pisa, Italy* (**30**, 5, p. 629) Article

C93-111 Identification of Actuation System and Aerodynamic Effects of Direct-Lift-Control Flaps. R. V. Jategaonkar, *Institute of Flight Mechanics, Germany* (**30**, 5, p. 636) Article based on AIAA Paper 92-0171

C93-112 Unsteady Wing Surface Pressures in the Wake of a Propeller. R. T. Johnston and J. P. Sullivan, *Purdue University* (**30**, 5, p. 644) Article based on AIAA Paper 92-0277

C93-113 Response of B-2 Aircraft to Nonuniform Spanwise Turbulence. John P. Crimaldi, Robert T. Britt and William P. Rodden, *Northrop Corporation B-2 Division* (**30**, 5, p. 652) Article based on AIAA Paper 91-1048 CP911

C93-114 Application of Nonlinear Systems Theory to Transonic Unsteady Aerodynamic Responses. Walter A. Silva, *NASA Langley Research Center* (**30**, 5, p. 660) Article based on AIAA Paper 91-1110 CP911

C93-115 Euler/Experiment Correlations of Sonic Boom Pressure Signatures. Susan E. Cliff, *NASA Ames Research Center*; and Scott D. Thomas, *Sterling Software, Inc.* (**30**, 5, p. 669) Article based on AIAA Paper 91-3276 CP918

C93-116 Experimental Study of Pylon Cross Sections for a Subsonic Transport Airplane. Dinesh A. Naik, *ViGYAN, Inc.*; Anthony M. Ingraldi and Odis C. Pendergraft, *NASA Langley Research Center* (**30**, 5, p. 676) Article based on AIAA Paper 92-0153

C93-117 Ground Facility Interference on Aircraft Configurations with Separated Flow. M. E. Beyers, *Institute for Aerospace Research, Canada*; and L. E. Ericsson, *Lockheed Missiles & Space Company* (**30**, 5, p. 682) Article based on AIAA Paper 92-0673

C93-118 Multielement Airfoil Performance due to Reynolds and Mach Number Variations. Walter O. Valarezo and Chet J. Dominik, *Douglas Aircraft Company*; and Robert J. McGhee, *NASA Langley Research Center* (**30**, 5, p. 689) Article

C93-119 Efficient Finite Element Method for Aircraft Deicing Problems. J. R. Huang, Theo G. Keith Jr. and Kenneth J. De Witt, *University of Toledo* (**30**, 5, p. 695) Article based on AIAA Paper 92-0532

C93-120 Lateral Aerodynamic Interference Between Tanker and Receiver in Air-to-Air Refueling. A. W. Bloy, M. G. West, K. A. Lea and M. Jouma'a, *University of Manchester, England, UK* (**30**, 5, p. 705) Article

C93-121 Investigation of Vortex Development on a Pitching Slender Body of Revolution. M. J. Stanek and M. R. Visbal, *Air Force Wright Laboratory* (**30**, 5, p. 711) Article based on AIAA Paper 91-3273 CP918

C93-122 Flowfield Simulation About the Stratospheric Observatory for Infrared Astronomy. Christopher A. Atwood and William R. Van Dalsem, *NASA Ames Research Center* (**30**, 5, p. 719) Article based on AIAA Paper 92-0656

C93-123 Rotor Wake/Stator Interaction Noise—Predictions vs Data. D. A. Topol, *Pratt & Whitney* (**30**, 5, p. 728) Article based on AIAA Paper 90-3951

C93-124 Efficient Simulation of Incompressible Viscous Flow over Single and Multielement Airfoils. Stuart E. Rogers, N. Lyn Wiltberger and Dochan Kwak, *NASA Ames Research Center* (**30**, 5, p. 736) Article based on AIAA Paper 92-0405

C93-125 Vector Unsymmetric Eigenequation Solver for Nonlinear Flutter Analysis on High-Performance Computers. Jiangning Qin, *Old Dominion University*; Carl E. Gray Jr., *NASA Langley Research Center*; and Chuh Mei, *Old Dominion University* (**30**, 5, p. 744) Article based on AIAA Paper 91-1169 CP911

C93-126 Monitoring Load Experience of Individual Aircraft. J. B. de Jonge, *National Aerospace Laboratory, The Netherlands* (**30**, 5, p. 751) Article

C93-127 Unsteady Pressure and Load Measurements on an F/A-18 Vertical Fin. B. H. K. Lee and F. C. Tang, *Institute for Aerospace Research, Canada* (**30**, 5, p. 756) Article based on AIAA Paper 92-2675 CP926

C93-128 Computation of Maximized Gust Loads for Nonlinear Aircraft Using Matched-Filter-Based Schemes. Robert C. Scott, *NASA Langley Research Center*; Anthony S. Pototzky, *Lockheed Engineering and Science Company*; and Boyd Perry III, *NASA Langley Research Center* (**30**, 5, p. 763) Article based on AIAA Paper 91-2848 CP916

C93-129 Stringer Peeling Effects at Stiffened Composite Panels in the Postbuckling Range. D. Hachenberg, *Deutsche Aerospace Airbus GmbH, Germany*; and H. Kossira, *Technical University, Germany* (**30**, 5, p. 769) Article

C93-130 Finite State Aeroelastic Model for Use in Rotor Design Optimization. Chengjian He and David A. Peters, *Georgia Institute of Technology* (**30**, 5, p. 777) Article

C93-131 Envelope Function—A Tool for Analyzing Flutter Data. J. E. Cooper, P. R. Emmett and J. R. Wright, *University of Manchester, England, UK*; and M. J. Schofield, *British Aerospace (Commercial Aircraft), Ltd., England, UK* (**30**, 5, p. 785) Article

C93-132 Transonic Navier-Stokes Flow Computations over Wing-Fuselage Geometries. S. Agrawal, *McDonnell Douglas Corporation*; V. N. Vatsa, *NASA Langley Research Center*; and T. A. Kinard, *Lockheed Corporation* (**30**, 5, p. 791) Engineering Note

C93-133 Effect of Leading-Edge Geometry on Delta Wing Unsteady Aerodynamics. L. E. Ericsson and H. H. C. King, *Lockheed Missiles and Space Company* (**30**, 5, p. 793) Engineering Note based on AIAA Paper 92-0173

C93-134 Alternative Solution to Optimum Gliding Velocity in a Steady Head Wind or Tail Wind. Philip D. Bridges, *Mississippi State University* (**30**, 5, p. 795) Engineering Note

C93-135 Navier-Stokes Investigation of Blunt Trailing-Edge Airfoils Using O Grids. M. Khalid and D. J. Jones, *Institute for Aerospace Research, National Research Council of Canada* (**30**, 5, p. 797) Engineering Note

C93-136 Numerical Analysis of Supersonic Multijets. Gamal H. Moustafa, *Menoufia University, Egypt*; K. S. Murali Rajan and E. Rathakrishnan, *Indian Institute of Technology* (**30**, 6, p. 801) Synoptic

C93-137 Measurement and Improvement of the Lateral Agility of the F-18. David P. Eggold, John Valasek and David R. Downing, *University of Kansas* (**30**, 6, p. 803) Synoptic based on AIAA Paper 91-2880 CP916

C93-138 Transonic Airfoil Design by Constrained Optimization. K. D. Lee and S. Eyi, *University of Illinois at Urbana-Champaign* (**30**, 6, p. 805) Synoptic based on AIAA Paper 91-3287 CP918

C93-139 Aerodynamic Performance Effects due to Small Leading-Edge Ice (Roughness) on Wings and Tails. Walter O. Valarezo and Frank T. Lynch, *McDonnell Douglas Corporation*; and Robert J. McGhee, *NASA Langley Research Center* (**30**, 6, p. 807) Article

C93-140 Experimental Verification of a Wall Interference Correction Method with Interface Measurements. C. F. Lo and N. Ulbrich, *University of Tennessee Space Institute* (**30**, 6, p. 813) Article

C93-141 Vortex Flow Control Using Fillets on a Double-Delta Wing. Steven B. Kern, *Naval Air Warfare Center* (**30**, 6, p. 818) Article based on AIAA Paper 92-0411

C93-142 Target Pitch Angle for the Microburst Escape Maneuver. Sandeep S. Mulgund and Robert F. Stengel, *Princeton University* (**30**, 6, p. 826) Article based on AIAA Paper 92-0730

C93-143 Computational Study of Blowing on Delta Wings at High Alpha. Ken Craig, *Stanford University* (**30**, 6, p. 833) Article based on AIAA Paper 92-0410

C93-144 Aerothermodynamic Properties of Hypersonic Flow over Radiation-Adiabatic Surfaces. Stefan Riedelbauch, *Deutsche Forschungsanstalt für Luft- und Raumfahrt, Germany*; and Ernst H. Hirschel, *Messerschmitt-Bölkow-Blohm GmbH, Germany* (**30**, 6, p. 840) Article

C93-145 Vortex Control Technique for the Attenuation of Fin Buffet. David E. Bean, Douglas I. Greenwell and Norman J. Wood, *University of Bath, England, UK* (**30**, 6, p. 847) Article

C93-146 Forward Flight Trim and Frequency Response Validation of a Helicopter Simulation Model. Frederick D. Kim and Roberto Celi, *University of Maryland*; and Mark B. Tischler, *NASA Ames Research Center* (**30**, 6, p. 854) Article

C93-147 Selected Design Issues of Some High-Speed Rotorcraft Concepts. Peter D. Talbot, James D. Phillips and Joseph J. Totah, *NASA Ames Research Center* (**30**, 6, p. 864) Article based on AIAA Paper 90-3297

C93-148 Ground Vortex Formed by Impinging Jets in Crossflow. K. Knowles and D. Bray, *Royal Military College of Science (Cranfield Institute of Technology), England, UK* (**30**, 6, p. 872) Article based on AIAA Paper 91-0768

C93-149 Investigation of Rotor Tip Vortex Interactions with a Body. Nai-Pei Bi, J. Gordon Leishman and Gilbert L. Crouse, *University of Maryland* (**30**, 6, p. 879) Article based on AIAA Paper 91-3228 CP918

C93-150 Response of Helicopter Blades to a Sharp Collective Increase. Y. Hecht and O. Rand, *Technion—Israel Institute of Technology* (**30**, 6, p. 889) Article

C93-151 Optimization of Joined-Wing Aircraft. John W. Gallman and Stephen C. Smith, *NASA Ames Research Center*; and Ilan M. Kroo, *Stanford University* (**30**, 6, p. 897) Article

C93-152 Optimizing Tuning Masses for Helicopter Rotor Blade Vibration Reduction and Comparison with Test Data. Jocelyn I. Pritchard, Howard M. Adelman, Joanne L. Walsh and Matthew L. Wilbur, *NASA Langley Research Center* (**30**, 6, p. 906) Article based on AIAA Paper 92-2376

C93-153 Euler Code Prediction of Near-Field to Midfield Sonic Boom Pressure Signatures. M. J. Siclari, *Grumman Corporate Research Center*; and C. M. Darden, *NASA Langley Research Center* (**30**, 6, p. 911) Article based on AIAA Paper 90-4000

C93-154 In-Flight Source Noise of an Advanced Large-Scale Single-Rotation Propeller. Richard P. Woodward and Irvin J. Loeffler, *NASA Lewis Research Center* (**30**, 6, p. 918) Article based on AIAA Paper 91-0594

C93-155 Analytical-Experimental Investigation of Free-Vibration Characteristics of Rotating Composite I-Beams. Ramesh Chandra and Inderjit Chopra, *University of Maryland* (**30**, 6, p. 927) Article

C93-156 Numerical Prediction of Vortical Flow over Slender Delta Wings. J. A. Ekaterinaris and Lewis B. Schiff, *NASA Ames Research Center* (**30**, 6, p. 935) Article based on AIAA Paper 90-0102

C93-157 Design Tradeoffs on Scramjet Engine Integrated Hypersonic Waverider Vehicles. Mary Kae Lockwood O'Neill and Mark J. Lewis, *University of Maryland* (**30**, 6, p. 943) Article based on AIAA Paper 92-1205

C93-158 Aerodynamic Shape Optimization Using Sensitivity Analysis on Third-Order Euler Equations. Oktay Baysal, Mohamed E. Eleshaky and Greg W. Burgreen, *Old Dominion University* (**30**, 6, p. 953) Article based on AIAA Paper 91-1577

C93-159 Prediction of Fluctuating Pressure in Attached and Separated Turbulent Boundary-Layer Flow. A. L. Laganelli, *Science Applications International Corporation*; and H. F. Wolfe, *WL/FIBG, Wright-Patterson Air Force Base* (**30**, 6, p. 962) Article based on AIAA Paper 89-1064

C93-160 Thermoacoustic Loads and Fatigue of Hypersonic Vehicle Skin Panels. Robert D. Blevins and Ian Holehouse, *Rohr Industries*; and Kenneth R. Wentz, *Wright Research and Development Center* (**30**, 6, p. 971) Article

C93-161 Optimization of Aircraft Engine Suspension Systems. D. A. Swanson and H. T. Wu, *Lord Corporation*; and H. Ashrafiuon, *Villanova University* (**30**, 6, p. 979) Article based on AIAA Paper 91-1102 CP911

C93-162 Impact of Active Controls Technology on Structural Integrity. Thomas E. Noll, *NASA Langley Research Center*; Edward Austin, *U.S. Army Aviation and Troop Command*; Shawn Donley, *Naval Air Warfare Center*; George Graham, *Canadian Department of National Defence, Canada*; Terry Harris, *U.S. Air Force Wright Laboratory*; Ian Kaynes, *Defence Research Agency, England, UK*; B. H. K. Lee, *Institute for Aerospace Research, Canada*; and James Sparrow, *DSTO Aeronautical Research Laboratory* (**30**, 6, p. 985) Article based on AIAA Paper 91-0988 CP911

C93-163 Finite Element Nonlinear Flutter and Fatigue Life of Two-Dimensional Panels with Temperature Effects. David Y. Xue and Chuh Mei, *Old Dominion University* (**30**, 6, p. 993) Article based on AIAA Paper 91-1170

C93-164 Accuracy of Rational-Function Approximations for Linear Transonic Unsteady Aerodynamics. Ashish Tewari, *National Aeronautical Laboratory, India* (**30**, 6, p. 1001) Engineering Note

C93-165 Fractional Order Calculus Model of the Generalized Theodorsen Function. Ronald L. Bagley, *Air Force Institute of Technology*; David V. Swinney, *Space Systems Division, Los Angeles AFB*; and Kenneth E. Griffin, *Wright Laboratory* (**30**, 6, p. 1003) Engineering Note

C93-166 Downwash Measurements on a Pitching Canard-Wing Configuration. John E. Burkhalter, *Frank J. Seiler Research Laboratory* (**30**, 6, p. 1005) Engineering Note
